

INSULIN ADMINISTRATION COMPETENCY

Overview

This course is aimed at all care sector staff and is designed to suit those working with adults, teenagers and children with diabetes. Training helps delegates achieve a general understanding of the challenges facing those with diabetes and the staff who help to manage these individuals and to competently administer Insulin.

Outline of Programme

1. Basic anatomy and physiology of the spleen
2. The different types of diabetes.
3. Understand Insulin and its function
4. Choose age appropriate sites for injection
5. Demonstrate correct injection technique using insulin
6. Identifying warning signs and symptoms of hypo and hyper glycaemia.
7. How to manage hypo and hyperglycaemic attacks.
- 8. Practical Demonstrations – How to competently administer Insulin**
9. Reporting and documentation

Assessment

This course takes around 3 hours and delegates will be expected to engage in a number of group activities. Our experienced trainers will be on hand to help guide delegates through these sessions and a CPD Accredited certificate will be awarded upon completion.
